

# Comparison of marine aerosol observations with AEROCOM models

Eimear Dunne ([Eimear.Dunne@fmi.fi](mailto:Eimear.Dunne@fmi.fi)) Hannele Korhonen, [Harri Kokkola](#),  
Tommi Bergman

Finnish Meteorological Institute, Kuopio Unit,  
PL 1627, 70211 Kuopio, Finland

- Marine-CCN project is designed to investigate and improve the performance of aerosol models in remote marine regions
- We are gathering as many observations data sets from marine regions as possible, and comparing them with a selection of AEROCOM models.

- Data already acquired from:

ACE1, ACE2

AERONET / MAN

ASCOS

Mace Head

MAP

NOAA

VOCALS

If any marine-based observations are available,  
please contact [Eimear.Dunne@fmi.fi](mailto:Eimear.Dunne@fmi.fi)  
to provide details.
