# Overview over the aerocom infrastructure at met Norway

CF conformity of future data submissions

- New ways of data distribution (other than scp/ftp, e.g. WCS, OPeNDAP) need a more standardized format of the netCDF files

- That standard is (for aerocom) the CF convention

- Conformity has to made sure by the modelers

- Met Norway will provide some help (howtos)

- Tools: CFChecker (from HTAP project)
